Experience

- Full Stack Javascript Developer / Mar 2016 - Sep 2016

Hewlett Packard Enterprise / Mougins, France :
Working on a full stack Javascript Project, I have developed a self-monitoring plugin in Node.JS for the server.

- 5th Year of engineering school in CS / Sep 2015 - Sep 2016

Polytech Nice Sophia / Sophia Antipolis, France :
For my last year in engineering school I chose to specialize in Software Architecture.

- Development of a Java application / Jul 2015 - Sep 2016

TargoBank / Duisburg, Germany :
For my 4th year internship I went to Germany to work on the development of a Java application. This application is now used to monitor latency in the company workflow .

Project

- Dashboard System for SmartCampus / Sep 2015 - Mar 2016

Polytech Nice Sophia - For my end-of-studies project, I have developed a web-application which generates a user-need-baed dashboard.

- Supervising Drone Delieri System / Sep 2015 - Mar 2016

Polytech Nice Sophia - During my Software Architecture classes, we had to develop an application able to monitor a big amount of drone. We built this application based on Apache Kafka / Storm.

- Guitar Effect Pedal Simulator / Jan 2016 - Mar 2016

Polytech Nice Sophia - As a collective work with three oter students, I developed a web application that enables users to create and save guitar pedal effects
